Cautionary Statements Regarding Forward-Looking Information

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, that are subject to risks and uncertainties. The factors that could cause actual results to differ materially from the forward-looking statements made by Exelon Corporation, Exelon Generation Company, LLC, Commonwealth Edison Company, PECO Energy Company, Baltimore Gas and Electric Company, Pepco Holdings LLC, Potomac Electric Power Company, Delmarva Power & Light Company, and Atlantic City Electric Company (Registrants) include those factors discussed herein, as well as the items discussed in (1) Exelon's 2018 Annual Report on Form 10-K in (a) Part I, ITEM 1A. Risk Factors, (b) Part II, ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part II, ITEM 8. Financial Statements and Supplementary Data: Note 22, Commitments and Contingencies; (2) Exelon's Third Quarter 2019 Quarterly Report on Form 10-Q (to be filed on October 31, 2019) in (a) Part II, ITEM 1A. Risk Factors; (b) Part 1, ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and (c) Part I, ITEM 1. Financial Statements: Note 16, Commitments and Contingencies; and (3) other factors discussed in filings with the SEC by the Registrants. Readers are cautioned not to place undue reliance on these forward-looking statements, which apply only as of the date of this presentation. None of the Registrants undertakes any obligation to publicly release any revision to its forward-looking statements to reflect events or circumstances after the date of this presentation.

Non-GAAP Financial Measures

Exelon reports its financial results in accordance with accounting principles generally accepted in the United States (GAAP). Exelon supplements the reporting of financial information determined in accordance with GAAP with certain non-GAAP financial measures, including:

- **Adjusted operating earnings** exclude certain costs, expenses, gains and losses and other specified items, including mark-to-market adjustments from economic hedging activities, unrealized gains and losses from nuclear decommissioning trust fund investments, asset impairments, certain amounts associated with plant retirements and divestitures, costs related to cost management programs, asset retirement obligations and other items as set forth in the reconciliation in the Appendix
- **Adjusted operating and maintenance expense** excludes regulatory operating and maintenance costs for the utility businesses and direct cost of sales for certain Constellation and Power businesses, decommissioning costs that do not affect profit and loss, the impact from operating and maintenance expense related to variable interest entities at Generation, EDF's ownership of O&M expenses, and other items as set forth in the reconciliation in the Appendix
- **Total gross margin** is defined as operating revenues less purchased power and fuel expense, excluding revenue related to decommissioning, gross receipts tax, JExel Nuclear JV, variable interest entities, and net of direct cost of sales for certain Constellation and Power businesses
- **Adjusted cash flow from operations** primarily includes net cash flows from operating activities and net cash flows from investing activities excluding capital expenditures, net merger and acquisitions, and equity investments
- **Free cash flow** primarily includes net cash flows from operating activities and net cash flows from investing activities excluding certain capital expenditures, net merger and acquisitions, and equity investments
- **Operating ROE** is calculated using operating net income divided by average equity for the period. The operating income reflects all lines of business for the utility business (Electric Distribution, Gas Distribution, Transmission).
- **EBITDA** is defined as earnings before interest, taxes, depreciation and amortization. Includes nuclear fuel amortization expense.
- **Revenue net of purchased power and fuel expense** is calculated as the GAAP measure of operating revenue less the GAAP measure of purchased power and fuel expense

Due to the forward-looking nature of some forecasted non-GAAP measures, information to reconcile the forecasted adjusted (non-GAAP) measures to the most directly comparable GAAP measure may not be currently available, as management is unable to project all of these items for future periods

Non-GAAP Financial Measures Continued

This information is intended to enhance an investor's overall understanding of period over period financial results and provide an indication of Exelon's baseline operating performance by excluding items that are considered by management to be not directly related to the ongoing operations of the business. In addition, this information is among the primary indicators management uses as a basis for evaluating performance, allocating resources, setting incentive compensation targets and planning and forecasting of future periods.

These non-GAAP financial measures are not a presentation defined under GAAP and may not be comparable to other companies' presentations. Exelon has provided these non-GAAP financial measures as supplemental information and in addition to the financial measures that are calculated and presented in accordance with GAAP. These non-GAAP measures should not be deemed more useful than, a substitute for, or an alternative to the most comparable GAAP measures provided in the materials presented.

Non-GAAP financial measures are identified by the phrase "non-GAAP" or an asterisk (*). Reconciliations of these non-GAAP measures to the most comparable GAAP measures are provided in the appendices and attachments to this presentation, except for the reconciliation for total gross margin, which appears on slide 44 of this presentation.

The Exelon Value Proposition

- **Regulated Utility Growth** with utility EPS rising 6-8% annually from 2018-2022 and rate base growth of 7.8%, representing an expanding majority of earnings
- **ExGen's strong free cash generation** will provide ~\$4.2B for utility growth and reduce debt by ~\$2.5B over the next 4 years
- **Optimizing ExGen value by:**
 - Seeking fair compensation for the zero-carbon attributes of our fleet;
 - Closing uneconomic plants;
 - Monetizing assets; and,
 - Maximizing the value of the fleet through our generation to load matching strategy
- **Strong balance sheet is a priority** with all businesses comfortably meeting investment grade credit metrics through the 2022 planning horizon
- **Capital allocation priorities targeting:**
 - Organic utility growth;
 - Return of capital to shareholders with 5% annual dividend growth through 2020⁽¹⁾;
 - Debt reduction; and,
 - Modest contracted generation investments

(1) Quarterly dividends are subject to declaration by the board of directors

2018 Business Priorities and Commitments

Maintain industry leading operational excellence

- First Quartile SAIFI performance at all utilities and First Quartile CAIDI performance at BGE, ComEd and PHI
- Record nuclear output of 159 TWhs, best ever average refueling days, and capacity factor of 94.6%⁽¹⁾
- Exceeded power dispatch match and renewables energy capture goals

Effectively deploy ~\$5.4B of 2018 utility capex

- Invested more than \$5.5B to replace aging infrastructure and improve reliability for the benefit of customers

Advance PJM power price formation changes

- Awaiting decision from FERC on fast start
- PJM is moving forward on scarcity pricing and reserves reforms with FERC filing expected in Q1 2019
- After assessing FERC's fast start decision, PJM will determine path forward for full integer relaxation

Prevail on legal challenges to the NY and IL ZEC programs

- The Second and Seventh Circuit Court decisions upheld the federal legality of the NY and IL programs

Seek fair compensation for at-risk plants in NJ and PA

- Governor Murphy signed the NJ ZEC bill into law in May 2018
- Bicameral Nuclear Energy Caucus in PA legislature released detailed report outlining options to preserve nuclear plants including a price on carbon pollution and Governor Wolf issued an executive order establishing carbon reduction goals for PA

Grow dividend at 5% rate

- Increased the dividend to \$1.38 from \$1.31 per share

Continued commitment to corporate responsibility

- Exelon employees volunteered more than 240,000 hours and donated nearly \$13M
- Exelon Foundation donated more than \$51M
- Received A- from Carbon Disclosure Project – 1 of 2 U.S. utilities to do so
- Named Best Company for Diversity by Forbes, Black Enterprise Magazine, DiversityInc and Human Rights Campaign

2018 GAAP Earnings of \$2.07 and Adjusted Operating Earnings* of \$3.12

- (1) Revenue requirement includes changes in depreciation and amortization expense and other costs where applicable, which have no impact on pre-tax earnings
- (2) Revenue requirement in initial filing was a decrease of (\$6.4M). Through the discovery period in the current proceeding, ComEd agreed to ~(\$10.5M) in adjustments to limit issues in the case.
- (3) Rate of Return and Return on Equity are used solely for AFUDC, surcharges and regulatory asset carrying charges and sets no precedent
- (4) Current revenue requirement reflects \$25.0M increase for electric and \$54.0M increase for gas. Increase reflects \$7.1M of ERI (electric) and \$8.7M of STRIDE (gas) that will be transferred from the ERI and STRIDE surcharges to base rates.
- (5) Reflects 3-year cumulative multi-year plan. Company proposed incremental revenue requirement increases of \$84M, \$40M and \$36M with rates effective November 1, 2020, January 1, 2021 and January 1, 2022, respectively.

Recent Developments

- 2019 Total Gross Margin* is flat due to increased power prices offset by our hedges and execution of a combined \$150M of power and non-power new business
- 2020 and 2021 Total Gross Margins* are flat due to increased power prices, offset by our hedges and new business target reductions; executed a combined \$100M of power and non-power new business in 2020
- The combined \$50M and \$100M power and non-power new business target reductions in 2020 and 2021, respectively, are due to decreased optimization opportunities from a low price and low volatility market
- Behind ratable hedging position reflects the fundamental upside we see in power prices
 - ~5-8% behind ratable in 2020 when considering cross commodity hedges
 - ~1-4% behind ratable in 2021 when considering cross commodity hedges

Significant historical investments have mitigated asset management issues and prepared sites for license extensions already received, reducing future capital needs. In addition, internal cost initiatives have found more cost efficient solutions to large CapEx spend, such as leveraging reverse engineering replacements rather than large system wide modifications, resulting in baseline CAGR of -1.2%, even with net addition of 2 sites.

Note: All amounts rounded to the nearest \$25M. Amounts may not sum due to rounding.

(1) Reflects accrual capital expenditures with CENG at 50% ownership. Assumes TMI retirement in September 2019.

(2) Baseline includes ownership share of Salem all years. CENG is included at ownership share starting in 2014 (full year)

(3) FitzPatrick included starting in 2017 (9 months only)

(4) Growth represents capital that increases the capacity of the units (e.g., turbine upgrades, power uprates), and capital that extends the license of a site (e.g., License Renewals)

(5) Includes CENG beginning in April 2014 and FitzPatrick beginning in April of 2017, excludes Salem and Fort Calhoun

(6) Industry average is for major operators excluding Exelon and includes 3 months of Fitzpatrick prior to Exelon acquisition. 2018 industry average (excluding Exelon) was not available at the time of publication.

- Between 2010 – 2017, retired or sold more than **2,000 MWs** of coal-fired generation
- Developed or bought **1,500 MWs** of renewable generation
- Increased output of nuclear fleet by more than **550 MWs**
- Invested in clean, efficient natural gas generation

Carbon Reduction Goals

Despite having the lowest carbon intensive generation, we have set a goal of an additional 15% reduction of GHG emissions from our internal operations

Support Policies to Reduce GHG Emissions

**CLIMATE
LEADERSHIP
COUNCIL**

Exelon is a founding member of the Climate Leadership Council – to advocate for a carbon fee-and-dividend program

Support legislation and regulation to expand electric vehicle infrastructure at the state and federal level

Support 100% clean energy standards

Enabling a Carbon Free Future

From generation to transmission to distribution, our sustainability strategy focuses on creating systems and policies that enable integrated clean energy solutions and connections for our customers

Consistent and reliable free cash flows*

Operational excellence and financial discipline drives free cash flow reliability*

- ✓ Generating \$5,525M of free cash flow*, including \$2,025M at ExGen and \$3,925M at the Utilities

Supported by a strong balance sheet

Strong balance sheet enables flexibility to raise and deploy capital for growth

- ✓ \$1,500M of long-term debt at the utilities, net of refinancing, to support continued growth and retirement of \$725M of ExGen debt

Enable growth & value creation

Creating value for customers, communities and shareholders

- ✓ Investing \$5,575M of growth CapEx, with \$5,450M at the Utilities and \$125M at ExGen

(1) Based on September 30, 2019, market conditions and hedged position. Gas price sensitivities are based on an assumed gas-power relationship derived from an internal model that is updated periodically. Power price sensitivities are derived by adjusting the power price assumption while keeping all other price inputs constant. Due to correlation of the various assumptions, the EPS impact calculated by aggregating individual sensitivities may not be equal to the EPS impact calculated when correlations between the various assumptions are also considered. ExGen EPS impact sensitivities assume a marginal tax rate of 25.5%.

Exelon Generation Disclosures

Data as of September 30, 2019

These disclosures were presented on October 31, 2019, and are not being updated at this time

Portfolio Management Strategy

Strategic Policy Alignment

- Aligns hedging program with financial policies and financial outlook
- Establish minimum hedge targets to meet financial objectives of the company (dividend, credit rating)
- Hedge enough commodity risk to meet future cash requirements under a stress scenario

Three-Year Ratable Hedging

- Ensure stability in near-term cash flows and earnings
- Disciplined approach to hedging
- Tenor aligns with customer preferences and market liquidity
- Multiple channels to market that allow us to maximize margins
- Large open position in outer years to benefit from price upside

Bull / Bear Program

- Ability to exercise fundamental market views to create value within the ratable framework
- Modified timing of hedges versus purely ratable
- Cross-commodity hedging (heat rate positions, options, etc.)
- Delivery locations, regional and zonal spread relationships

Align Hedging & Financials

Establishing Minimum Hedge Targets

Portfolio Management Over Time

Exercising Market Views

Protect Balance Sheet

Ensure Earnings Stability

Components of Gross Margin* Categories

Gross margin* linked to power production and sales

Open Gross Margin*

- Generation Gross Margin* at current market prices, including ancillary revenues, nuclear fuel amortization and fuels expense
- Power Purchase Agreement (PPA) Costs and Revenues
- Provided at a consolidated level for all regions (includes hedged gross margin* for South, West, New England and Canada⁽¹⁾)

Capacity and ZEC Revenues

- Expected capacity revenues for generation of electricity
- Expected revenues from Zero Emissions Credits (ZEC)

MtM of Hedges⁽²⁾

- Mark-to-Market (MtM) of power, capacity and ancillary hedges, including cross commodity, retail and wholesale load transactions
- Provided directly at a consolidated level for four major regions. Provided indirectly for each of the four major regions via Effective Realized Energy Price (EREP), reference price, hedge %, expected generation.

“Power” New Business

- Retail, Wholesale planned electric sales
- Portfolio Management new business
- Mid marketing new business

Gross margin* from other business activities

“Non Power” Executed

- Retail, Wholesale executed gas sales
- Energy Efficiency⁽⁴⁾
- BGE Home⁽⁴⁾
- Distributed Solar

“Non Power” New Business

- Retail, Wholesale planned gas sales
- Energy Efficiency⁽⁴⁾
- BGE Home⁽⁴⁾
- Distributed Solar
- Portfolio Management / origination fuels new business
- Proprietary trading⁽³⁾

Margins move from new business to MtM of hedges over the course of the year as sales are executed⁽⁵⁾

Margins move from “Non power new business” to “Non power executed” over the course of the year

- (1) Hedged gross margins* for South, West, New England & Canada region will be included with Open Gross Margin; no expected generation, hedge %, EREP or reference prices provided for this region
- (2) MtM of hedges provided directly for the four larger regions; MtM of hedges is not provided directly at the regional level but can be easily estimated using EREP, reference price and hedged MWh
- (3) Proprietary trading gross margins* will generally remain within “Non Power” New Business category and only move to “Non Power” Executed category upon management discretion
- (4) Gross margin* for these businesses are net of direct “cost of sales”
- (5) Margins for South, West, New England & Canada regions and optimization of fuel and PPA activities captured in Open Gross Margin*

- (1) Expected generation is the volume of energy that best represents our commodity position in energy markets from owned or contracted for capacity based upon a simulated dispatch model that makes assumptions regarding future market conditions, which are calibrated to market quotes for power, fuel, load following products, and options. Expected generation assumes 11 refueling outages in 2019, 14 in 2020, and 13 in 2021 at Exelon-operated nuclear plants and Salem. Expected generation assumes capacity factors of 95.4%, 93.9%, and 94.2% in 2019, 2020, and 2021, respectively at Exelon-operated nuclear plants, at ownership. These estimates of expected generation in 2020 and 2021 do not represent guidance or a forecast of future results as Exelon has not completed its planning or optimization processes for those years.
- (2) Excludes EDF's equity ownership share of CENG Joint Venture
- (3) Percent of expected generation hedged is the amount of equivalent sales divided by expected generation. Includes all hedging products, such as wholesale and retail sales of power, options and swaps.
- (4) Effective realized energy price is representative of an all-in hedged price, on a per MWh basis, at which expected generation has been hedged. It is developed by considering the energy revenues and costs associated with our hedges and by considering the fossil fuel that has been purchased to lock in margin. It excludes uranium costs, RPM capacity and ZEC revenues, but includes the mark-to-market value of capacity contracted at prices other than RPM clearing prices including our load obligations. It can be compared with the reference prices used to calculate open gross margin* in order to determine the mark-to-market value of Exelon Generation's energy hedges.
- (5) Spark spreads shown for ERCOT

Projected GAAP to Operating Adjustments

- **Exelon's projected 2019 adjusted (non-GAAP) operating earnings excludes the earnings effects of the following:**
 - Mark-to-market adjustments from economic hedging activities;
 - Unrealized gains and losses from NDT funds to the extent not offset by contractual accounting as described in the notes to the consolidated financial statements;
 - Asset impairments;
 - Impacts related to early plant retirements and divestitures;
 - Certain costs incurred to achieve cost management program savings;
 - Asset retirement obligations;
 - Other unusual items; and
 - Generation's noncontrolling interest related to CENG exclusion items.
